## **DETAILED ACTION**

### ***Election/Restrictions***

1. A telephone call was made to Xiaoqiang Su on 27 January 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-31, drawn to a method of placing an order for product/services from a supplier and delivering the order to a customer specified location, classified in class 705, subclass 26.
- II. Claims 32-36, drawn to a method of using a portable shopping list to place an order, classified in class 705, subclass 27.

The disclosed species are distinct because invention II provides a fixed means that is connected to an electronic-commerce site over a computer driven network and the submitting of the list through the fixed means in steps (b) and (d) of claim 32, which is not required in invention I.

3. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah R. Gedrich whose telephone number is (703) 306-5449. The examiner can normally be reached on M-F 7:30am - 5:00pm, alternating Fridays.
